CPS 242 - Dr. Gowda

A5

## Changes from A4

### **CSS/Design**

Our A4 did not have a proper menubar, so we created a new one that used CSS to display other pages of our site. We applied formatting to the <ul> and <li> tags to accomplish this.

### **Pages**

Many new pages have been added to our site, and are listed below:

- Order - this page is where customers will browse food options to place an order
- Apply to be a Quick Eats Driver - potential employees can submit a job application
- Contact Us - allows customers, drivers, and vendors to submit feedback, request assistance, or tell us anything they wanted us to know
- About - provides information about our site and our service
- Locations - this page displays all of the locations where our service is available

### **Other updates**

- Added logo design to multiples pages for cohesiveness, consistency, and to maintain brand identity
- Adjusted line spacings for legibility
- Updated and added more descriptions to multiples pages
